PROJECT DEVELOPMENT PHASE
# SPRINT -3

| Date	15 November 2022
Team ID	PNT2022TMID23968
Project Name	Global Sales Data Analytics

- Report is a type of business report in which we present quantitative and qualitative data to evaluate the strategies and performances.
- Based on this data we gives recommendation for further steps and business decisions while using the data as evidences that backup our evaluation.
- It is also an end to end data visualization capabilities to application but with a more detailed manner.
- It can gives some useful information about the dataset modules.
    - First we can login to the IBM cognos account.
    - Then click the left side of the corner and then shows some drop down list.
    - Click the new option from the drop down list.
    - Then click to create the report option and then click the required templates.
   - Then finally visualization the chart.
